Patient-Generated Health Data: A Growing Opportunity

Patient-generated health data can help clinicians track progress on treatment plans – and catch problems early, when they're easier to address.

More than

4 in 10 smartphone or tablet owners used their devices to **track progress on a health-related goal**.

About

3 in 10 people **own a monitoring device** such as a Fitbit, blood glucose meter, or blood pressure monitor.

2 in 10 tablet, smartphone, and monitoring device owners **already share and discuss data** from these devices with their health care providers.
